### PROFILE

Highly skilled Front-End Engineer adept in crafting captivating user experiences through mastery of React.js and Node.js. With a proven track record of developing exceptional projects, I seamlessly blend creativity with technical expertise to deliver cutting-edge solutions. Passionate about pushing boundaries in web development, I thrive in collaborative environments where innovation flourishes. Ready to leverage my talents to drive impactful results and elevate your team's success.

### PROJECTS

#### E-Commerce Website

3rd semester minor project 2022-2023

- The 3rd semester minor project is an e-commerce website designed to offer a seamless shopping experience. It features user-friendly navigation, secure payment gateways, and interactive product displays. Leveraging modern web technologies like React.js and Node.js, the site ensures fast loading times and responsiveness across devices. Robust backend functionalities handle inventory management, order processing, and customer data securely. The project demonstrates proficiency in full-stack development and a commitment to delivering practical solutions in the e-commerce domain..

#### Starbucks Landing Page

Using HTML, CSS AND JavaScript

- Stylish Starbucks landing page with HTML, CSS, and JS. Offers elegant design, seamless navigation, and interactive features for enhanced user engagement.

#### MyPortfolio

Using HTML, CSS AND JavaScript

- MyPortfolio is a dynamic and visually appealing website showcasing my professional work and skills. Developed using HTML, CSS, and JavaScript, it features a modern and responsive design, ensuring seamless viewing across various devices. Visitors can explore my projects, learn about my background, and get in touch easily. With sleek animations and interactive elements, MyPortfolio stands out as a compelling representation of my expertise and creativity in web development.

### INTERESTS

#### WEB 3.0

- Web 3.0: Decentralized, blockchain-driven internet fostering privacy and interoperability.
